

Motorcycle Maintenance Checklist

Get ready to ride with this checklist! Make sure you are all set with the supplies you need to give your bike a fresh start for the season ahead.

1) OILS AND CHEMICALS.

Perform an oil change.

Check all fluids where applicable - coolant, primary fluid, transmission fluid and/or final drive gear oil.

2) TIRES

Check tire pressure

Check tire thread depth

3) BATTERY CHARGERS AND MAINTAINERS

Charge your battery or replace if necessary

4) LIGHTS AND CABLES

Test all lights and make sure they are working properly.

Confirm the throttle, clutch and brake cables are working smoothly

5) BRAKES AND BRAKE PADS

Check brake fluid levels

Inspect brake line/hose condition

Check brake pad thickness

6) FILTERS

Remove any debris and replace if necessary

7) CHAINS AND/OR BELTS

Lube chain as necessary. Check for wear and tear on belt.

8) SEATS AND GRIPS

Check for cracks on seats. Check for tears in grips.

9) HELMETS AND FACE SHIELDS

Inspect for cracks in both the helmets and face shields. Replace as necessary.

How old is your helmet? DOT suggestions are that helmets should be replaced periodically for safety.

10) GLOVES, JACKETS AND BOOTS

Check for normal wear and tear on gloves and jackets. Check for good soles and heels on boots.

11) SADDLE BAGS

Check the saddle bags to see what you have in there. Perhaps something you have forgotten about or no longer need there. Added weight means less gas mileage!

12) YOU!

Are you prepared to ride? Are you physically and mentally ready for this ride?

RIDE WITH PRIDE!
